Keep four-, five-, six-year rates, transfer-out rates, and demographic subsets distinct. Earlier metadata contains disclosure perturbation notices; retain annual metadata.

Race reporting changes across the historical span; older combined categories and optional/new reporting regimes require explicit year metadata. Source-table equivalence at the join does not establish race-population invariance across all years.

Keep four-, five-, six-year rates, transfer-out rates, and demographic subsets distinct. Earlier metadata contains disclosure perturbation notices; retain annual metadata.

Race reporting changes across the historical span; older combined categories and optional/new reporting regimes require explicit year metadata. Source-table equivalence at the join does not establish race-population invariance across all years.

Keep four-, five-, six-year rates, transfer-out rates, and demographic subsets distinct. Earlier metadata contains disclosure perturbation notices; retain annual metadata.

Race reporting changes across the historical span; older combined categories and optional/new reporting regimes require explicit year metadata. Source-table equivalence at the join does not establish race-population invariance across all years.

Keep four-, five-, six-year rates, transfer-out rates, and demographic subsets distinct. Earlier metadata contains disclosure perturbation notices; retain annual metadata.

Race reporting changes across the historical span; older combined categories and optional/new reporting regimes require explicit year metadata. Source-table equivalence at the join does not establish race-population invariance across all years.
