Includes Pell Grants and reimbursement for costs of administering federal financial aid programs. Grants and contracts should be classified to identify the governmental level - federal, state, or local - funding the grant or contract to the institution; grants and contracts from other sources are classified as nongovernmental grants and contracts. GASB institutions are required to classify in financial reports such grants and contracts as either operating or nonoperating. Operating transactions are incurred in the course of the operating activities of the institution Nonoperating - GASB requires that revenues and expenses be separated between operating and nonoperating. Operating revenues and expenses result from providing goods and services. Nonoperating activities are those outside the activities that are part of the operating activities of the institution. Most government appropriations are nonoperating because they are not generated by the operations of the institution. Investment income is nonoperating in most instances because institutions are not engaged in investing as an operating activity. Gifts are defined as nonoperating. Nonexchange transactions generate nonoperating revenues.
